PROFESSIONAL SUMMARY

Backend-heavy Web Experience Engineer with 5+ years of experience building scalable, high-performance systems across logistics, e-commerce, SaaS, and education platforms.

I specialize in designing backend architectures that directly improve user experience — optimizing performance, reliability, and system scalability while maintaining clean, maintainable codebases.

Proven impact includes reducing API latency by over 50%, improving system reliability by 100%, and accelerating development cycles by over 40%.

CORE SKILLS

Backend Engineering: Node.js, TypeScript, NestJS, Express, REST APIs, GraphQL, DDD

Database & Performance: PostgreSQL, MySQL, MongoDB, Redis, BullMQ

Architecture: Microservices, Modular Monoliths, Event-Driven Systems, Multi-Tenant Systems

Fullstack: React, Next.js, Nuxt.js

DevOps: Docker, Traefik, Cloudflare, CI/CD

PROFESSIONAL EXPERIENCE

Senior Backend Engineer (Contract) – FlexDelivery24 (2025 – Present)

- Re-architected backend using NestJS and DDD
- Reduced API latency by 50%+
- Improved system reliability by 100%
- Reduced DB lag by 50%+
- Increased delivery speed by 40%+

Full Stack Developer (Contract) – Gardeners For Africa (2023 – Present)

- Sole engineer building SaaS platform
- Built backend with NestJS & PostgreSQL
- Built frontend with Next.js
- Managed deployment with Docker & Traefik

Backend Instructor – Attueyi Coding Academy (2023 – Present)

- Taught Node.js, REST APIs, and database fundamentals
- Mentored students into industry-ready engineers

Software Engineer – Saricino Media Group (2024 – 2026)

- Led client project implementations
- Managed WordPress deployments and support

Backend Developer – Loiz Tours & Travels (2023 – 2025)

- Built e-commerce backend
- Integrated Paystack & Flutterwave
- Developed CRM integrations

Junior Backend Developer – Spire Africa (2021 – 2022)

- Built APIs with Node.js and GraphQL
- Worked on microservices systems

Junior Fullstack Developer – First Class Pilot (2021 – 2022)

- Built React frontends and Laravel backends

PROJECTS

TIS Letters Studio – Fullstack SaaS Application (Nextjs, NestJS, payments, analytics)

OptiPix – Multi-tenant image optimization SaaS (Go, Nextjs, Postgres)

Multi-Tenant School System – Containerized architecture

ENGINEERING PHILOSOPHY

Backend performance impacts UX. Clean architecture reduces cost. Simplicity scales.
